

CYBERSECURITY FOR LAW FIRMS:

Witness Demos on Live Hacking and Phishing Attack from an Ethical Hacker and Learn How To Protect Your Firm and Your Clients Against Cyber Attacks!

No industry is immunised against cyberthreats, more so for the legal sector with the advent of cloud computing as a fast and scalable way to use advanced legal technology tools. Cloud services with their benefits, however come with security and data concerns.

In this digital age, with the ever changing landscapes of law and technology, what can a law firm do to protect its data and confidential client information?

OtterEsq is pleased to collaborate with IBM to bring you a very special session on CYBERSECURITY FOR LAW FIRMS. The session will focus on understanding where the security risks areas are and best practices to adopt for law firms to mitigate their risks.

Our invited speaker, **Loi Liang Yang** at IBM has garnered more than 1 million Youtube views on ethical hacking and network defence practices - do take the opportunity to watch **FIRSTHAND** how CYBERATTACKS can happen and learn what are the measures you can take to protect your firm!

DATE: Friday, 28 February 2020

TIME: 10.30 am to 12 noon

VENUE: UIC Building, 5 Shenton Way #10-01, Singapore 068808

AGENDA:

- Live Hacking Demonstration
- Phishing Attack Demonstration
- Protect Yourself From Cyber Threats
- Future of Cybersecurity
- Q&A

KEY TAKEAWAYS:

- ✓ Learn what are the common cyber security threats and how they work
- ✓ Understand areas of risks
- ✓ Minimise your exposure by knowing what security practices, technologies and/or processes should be in place to protect you and your clients' sensitive information.

SPEAKER:

Mr Loi Liang Yang is a Certified Information Systems Security Professional (CISSP), Certified Ethical Hacker and CompTIA Security+ cybersecurity consultant at IBM.

Loi advises large enterprises including multiple Fortune 500 companies on security strategies to protect against advanced cyber threats. Loi has garnered more than 1 million YouTube views on ethical hacking and network defence practices.
